OWNER

City of Joliet, Illinois

GEOCON provided field Quality Control services to Austin Tyler Construction for the resurfacing of Richards Street exiting I-80 and connecting IL Route 52 in Joliet, Illinois. The Illinois Department of Transportation (IDOT) chose this pilot project to highlight a Hot-Mix-Asphalt (HMA) pavement that contained only recycled products. GEOCON worked with Austin Tyler and IDOT officials constructing and testing the innovative 100% recycled asphalt surface course to provide not just a newly surfaced roadway but a “Green” roadway. Together we are paving the way to the future as we help construct sustainable roads while leaving a small carbon footprint.
