

## CONSTRUCTION INSPECTION SERVICES

New Storage Tank Farm  
East Chicago, Indiana

### CLIENT / CONTACT

Safety-Kleen Corporation  
Mr. Jerry Suprin  
5400 Legacy Drive  
Cluster II, Building 3  
Plano, Texas

### OWNER

Safety-Kleen Corporation

Safety-Kleen Corporation provides environmental services to commercial, industrial and automotive customers. The company is the largest re-refiner of used oil and provider of parts cleaning services and equipment in North America.

GEOCON performed testing and inspection services for the construction of Safety-Kleen's new storage tank farm, used for proper collection, processing, re-refining, recycling and disposal of hazardous and non-hazardous materials, including reclaiming and reusing used oil and spent cleaning solvent

The construction of this new storage operations complex involved four 2 million gallon oil storage tanks, numerous support buildings and pipe racks, concrete containment berms, and asphalt paved access roads. The project duration was six months.

### Partial List of Services Provided:

- Subgrade strength testing
- Proofroll tests
- Soil and aggregate compaction testing
- Rebar inspections
- Fresh concrete testing and monitoring
- Compressive strength testing
- Asphalt density testing
